[linkedin.com/in/emad-gasser](https://www.linkedin.com/in/emad-gasser)

## Summary

Been programming for 4 years in Python, currently specialized in Backend Development using Python's Django framework, REST-API design using DRF3, and database design & optimization using PostgreSQL and ORMs.

Also capable of conducting efficient and effective unit tests, integration tests, web automation using selenium. With hands on experience using Github Actions for CI/CD.

Key skills also expand beyond Backend Development with Frontend knowledge in HTML-CSS-JavaScript and the Bootstrap5 library.

Paired up with my experience in technology and computers is my love for Business and Entrepreneurship. And with this combined knowledge I transform code and technical ideas into monetized web applications and online businesses, accelerated by knowledge of Google's SEO and social media marketing on Instagram and Facebook.
